RDI’s headquarters and engineering facilities are located in Mount Kisco, NY with wholly owned manufacturing operations in Shenzhen, China.

Our manufacturing facilities are ISO 9001 certified with Six Sigma quality engineering support and fully compliant RoHS manufacturing.

Product design and test development, coupled with rapid prototyping to production, are critical to the long-term success of RDI projects. Procedures in place include MTBF analysis and sustained engineering to ensure on-time and on-budget product launches.

RDI’s technical team consists of electrical, firmware, mechanical, RF and quality engineers, along with industrial designers and programmers.

We offers a full range of fixtureless testing options, including x-ray, automated optical inspection and ICT equipment.

Our experience extends from electro-mechanical box builds to complex systems for products such as RF, video and audio devices, broadband cable interfaces, telephony equipment, consumer products and switch controls.

RDI TAKES A PRODUCT FROM CONCEPT TO FINISHED MARKET READY SOLUTION

CONTRACT MANUFACTURING SERVICES

- PCB Design
- Schematic Design
- Industrial and Mechanical Design
- In-house tooling
- Injection molding
- Firmware Development / BSP
- RoHS Compliant SMT PCB assembly
- Materials management
- Custom Cable Assemblies
- Medium and high volume product manufacturing
- Logistics support
